

12-Input Expansion Module, Ipassan, 2 Wire, Wiegand, Rs485

1088/455

Product specifications:

- 12 inputs with EOL resistors
- Connection to the Ipassan control unit either on the input module 1088/451 or the output module 1088/452
- Ideal for checking additional devices (sensor, fire alarm, etc.)
- LED indicators for input status
- Dimension (W x H x D): 198 x 30 x 70 mm
- operating temperature: -20°C 50°C

Description

The expansion module is used to manage 12 additional inputs. Connects to the iPassan control unit or 10-input 1088/451 or 10-output 1088/452 module.

The device offers easy management of additional inputs from: sensors, switches, alarms, etc.
