

80 CH, S+265 NVR NEIUS Platinum, 16M, RAID, 8HDD slot

1098/455A

Product Specifications:

- Video Compression: S+265/H.265/H.264
- Channels: 80ch
- Supports: Live video and playback for cameras up to 12MP resolution
- Simultaneous Video Outputs: 2xHDMI and 2xVGA
- HDMI Output Resolution: 4K (3840 x 2160)
- HDD Slots: 8 SATA for recording and backup, with a maximum of 18TB per HDD
- RAID Configurations: JBOD, RAID0, RAID1, RAID5, RAID6, RAID10
- Network Interface: 2xRJ45 self-adaptive 10/100/1000 Mbps
- Centralized IP Camera Management: Includes configuration, import/export of information, real-time info display, updates, etc.
- VCA Alarm Detection Supported
- Intelligent Search: Selectable video area and smart playback to improve playback efficiency
- Web Compatibility: IE10+; Firefox52+; Edge89+; Safari11+; Chrome57+

Description

The Neius NVR range includes a wide choice of devices for video recording of video streams from IP cameras. Increased performance allows most requirements to be met from small designs to more complex systems with specific needs in terms of the number of video streams to be managed and recorded, video quality, better optimisation of available bandwidth, backup and maximum resilience to data loss thanks to RAID, available on some models. All solutions are prepared for video decoding in S+265, which saves 50% of storage space and bandwidth compared to the H.265 codec. To complete the performance, the NVR range supports the 2nd generation video analysis of IP cameras, allowing complete professional management of behavioural analysis, statistical activities, presence alarms, prohibited parking, people/vehicle classification, construction site helmet detection, and definition of the maximum number of people allowed in an area.
