

CallMe call forwarding device, for 1722 kit

1722/58A

Description

It allows video door phone calls to be forwarded to the remote mobile phone or tablet. The CallMe app installed on your Android or iOS device allows you to answer and open the door or driveway gate. It is also possible to query the entry panel cameras, and other connected surveillance cameras on the 2VOICE system, from the mobile phone without having received the call. Compatible with all kits 1722 on the catalogue.
