Description

The kit, with 2-wire operation, allows for 1- to 12-family installations. The product consists of a video door phone and an entry panel to which call buttons can be added.

With the kit it is possible to manage up to 4 devices in parallel, 2 video door phone entry panels and 2 CCTV surveillance cameras. The entry panel is designed to house an access control module to open the door with a tag, while the video door phone, in addition to performing the intercom service in the flat, can divert the call to a smartphone by adding a wi-fi module inside.

The entry panel is equipped with a DDA module to indicate the operating status of the system: call in progress - talk - door opening.

Up to 4 relays per flat can be connected in the bus line for the management of additional services such as staircase lights or additional locks.

The kit includes:

- no. 1 item no. 1736/1, Video door phone with 7" soft touch display, white
- no. 1 item no. 1736/51, One-family video door phone entry panel with 2 wires
- no. 1 item no. 1736/100, 30Vdc power supply unit for system 1736
