- Lock control: 12V DC/VAC
- Driveway gate control: 1A @ 30V DC
- Input: 110-230V AC
- Output: 30V DC
- 5 DIN modules

Description

The kit, operating with 2 wires, allows for the installation of systems for 1 to 4 families. The product consists of a video intercom and a push-button panel to which call buttons can be added.

With the kit, it is possible to manage up to 4 devices in parallel, 2 video intercom push-button panels, and 2 CCTV control cameras. The push-button panel is designed to house an access control module inside it to open the door with a tag, while the video intercom, in addition to providing intercom service in the apartment, can divert the call to a smartphone by adding a Wi-Fi module inside it.

The push-button panel is equipped with a DDA module to indicate the system's operating status: call in progress - speak - door opening.

In the Bus line, it is possible to connect up to 4 relays for each apartment for the management of additional services such as staircase lights or additional locks.

The kit is composed of:

- n. 1 Video intercom, 7" soft touch display, white
- n. 1 Single-family video intercom push-button panel, 2 wires
- n. 1 30Vdc power supply, system 1736
