

Wi-fi interface for call forwarding to Smartphone, 1736

1736/67

- Wi-fi connection: 2.4GHz
- SD card: max 32Gb - not supplied

Description

The Wi-fi module allows the video door phone call to be transferred to a Smartphone, whether IOS from Version 10 or Android from Version 8. Using the URMET VIEW APP you can see, speak and open the door to the person in front of the entry panel. In addition, it is possible to video record, capture screenshots, activate pre-recorded messages and manage additional services if the system relay device 1736/70 is installed.
