

## 10/100/1000Mbps single port + SFP media converter

3000/480

### Product specification:

- 1 port RJ45 10/100/1000M + 1 fiber port 1000M
- Supports single mode fiber
- up to 3km
- Full-duplex and half-duplex transmission modes
- Adapter Power voltage AC 100-240V
- Media converter input voltage DC 5V
- Adopts store-and-forward architecture
- Standard IEEE 802.3 10 Base-T, IEEE 802.3u 100Base-TX/FX, IEEE802.3x, IEEE802.1ad 1000Base-TX/FX
- Low energy consumption
- Metal housing
- Complies with CE, RoHS certifications
- Suitable for desk for rack mounting
- Dimension 94 x 70 x 26mm
- Weight 0,20 kg

**116,54 Euro (VAT excluded)**  
Price list valid from 01/09/2024

## Description

Line converter that allows to transform a 10/100/1000M copper line with RJ45 connector into a single-mode fibre line with a maximum distance of 3 km. It is a self-adaptive device that handles both full-duplex and half-duplex transmission modes. Supported network protocols are IEEE802.3, IEEE802.3u, IEEE802.3ab and IEEE802.3x. The metal housing with double side ventilation window allows effective heat dissipation. It is suitable for real-time transmission of data, voice and video signals in industrial environments.
