

## Egeo video door phone and telephone

4099/45

- Power: 12Vdc external power unit 110-230Vac 50-60Hz ; Installation: table-top; Dimensions (W x H x D): 185 x 215 x 65 mm

### Description

The "Egeo" video door phone and telephone integrates the features of a multifunctional telephone with those of a video door phone. The various functions of the device are managed on the colour screen (TFT 3.5") which also shows the video door phone picture. The large screen makes telephone numbers even easier to read. Connected as a telephone to a Urmet Domus PABX (ref. 1372/312, 1362/624) or to the interface ref. 1332/40, the device can identify telephone and door phone calls. The video door phone picture is immediately displayed on the screen. The device is ready to work in 4+n systems with video distributor ref. 4099/55. Other interface boards are needed for operation in other system types. Special features of the device, in addition to traditional telephone functions, are: hands-free function; Caller ID function (CLI); Number/name phonebook; Door opening buttons, switch between calls to door unit and telephone/door phone line; multilingual menu: Italian, English, French, German and Spanish. An RJ11 port is provided for connecting to the telephone line and a RJ45 port is provided for connecting to the video distributor. Color: anthracite
