

## 2-button transmitter, Zigbee Yokis UP system, wall-mounted, with white plastic aesthetics, for 2-module and round flush-mount boxes

4820399

### Product specifications:

- Range: in the same room
- Radio protocol: Zigbee 3.0
- Frequency: 2.4 GHz
- Transmission: Bidirectional with notification LED on the transmitter
- Battery: CR2032 lithium type
- Average battery life: 5 years (Battery replacement is done by opening the container with a slotted screwdriver). Data is retained.
- Number of receivers/channel: 8 in direct mode; unlimited in centralisation/scenario mode
- Operating temperature: -10°C to +50°C
- IP54 protection
- Maximum relative humidity: 70%
- Dimensions (H x W x D): 80 x 80 x 9 mm

## Description

The TLM2-UP wall radio transmitter is a universal 2-channel radio transmitter, capable of controlling all types of Yokis UP radio receivers (relays, dimmers, roller shutter modules, and gate control modules) and third-party lighting devices based on Zigbee 3.0 protocol.

With this remote control, you can manage not only direct commands but also centralisation commands and scenario activation.

Thanks to the Zigbee radio protocol, it is possible to transmit commands to modules not directly reachable by the transmitter, using command repetition by the present actuator modules, and to transmit commands to groups of different types of modules (relays, dimmers, roller shutter actuators, etc.).

It is easy to configure: both by the installer, through the device button or via the UP2Pro App, and by the user, through the YnO UP App.

It is possible to duplicate the transmitters by copying the settings of the first one onto the subsequent ones, without intervening on the receiver modules.

The TLM2-UP is made of white plastic, compatible with 2-module flush-mounting boxes (support for flush-mounting box), but can be installed on any flat surface using the supplied double-sided adhesive.

The transmitter is powered by a standard CR2032 battery (average battery life of more than 5 years).

Accessories:

A2F (code 5454079) - Pack of 10 stickers for describing the function associated with the button
