

## Pack with no. 5 diodes, wired system, for centralisation via pilot wire

5454072

### Product specification:

- 1A power rectifier diode
- Voltage: 1000V
- Rated current: 1A
- Operating temperature: -50 ° C - 150 ° C

## Description

Diode required for centralization of light commands and actuation via pilot wire. It allows to isolate the local control commands from the rest of the system.

## Logistic data

- Packaging quantity single: **1**
- EAN single: **3760054540729**
- Base: **45 mm**
- Height: **75 mm**
- Depth: **25 mm**
